

## **ESSEX HEIGHTS PRIMARY SCHOOL**

### **CARE ARRANGEMENTS FOR ILL STUDENTS AND**

### **STUDENTS WITH MEDICAL CONDITIONS POLICY**

All children have the right to feel safe and well, and know that they will be attended to with due care when in need of first aid. The Care Arrangements are to be read in conjunction with the Essex Heights PS First Aid Policy which outlines the school's responsibility and procedures with respect to our "responsibility to provide equitable access to education and respond to diverse student needs, including health care needs".

#### **Our School will:**

- administer first aid to children as needed in a competent and timely manner.
- communicate children's health problems to parents when considered necessary.
- provide supplies and facilities to cater for the administering of first aid.
- maintain a sufficient number of staff members trained with a level 2 first aid certificate.

#### **Implementation:**

##### **1.0 First Aid**

- A first aid room will be available for use at all times. A comprehensive supply of basic first aid materials will be stored in a locked cupboard in the first aid room.
- First aid kits will also be available in each classroom of the school.
- Supervision of the first aid room will be the First Aid Officer between 11:00am and 3:00pm daily. Times either side of this will be staffed by administration personnel who are Level 2 First Aid trained. Any children in the first aid room will be supervised by a staff member at all times.
- Minor injuries only will be treated by staff members on yard duty or in the classroom, while more serious injuries-including those requiring parents to be notified or suspected treatment by a doctor - require a level 2 first aid trained staff member to provide first aid.
- Any children with injuries involving blood must have the wound covered at all times.
- **No medication including headache tablets will be administered to children without the express written or phone authority of parents or guardians, except in life-threatening situations where asthma/anaphylaxis medication will be provided.**
- All children will have access to an asthma reliever and a spacer at all times.
- A record will be maintained of all children who receive first aid using a daily running sheet and then Compass, indicating the nature of the injury, any treatment given, and the outcome of the first aid provided i.e. return to class/home/doctor. For more serious injuries/illnesses, the parents/guardians must be contacted by the First Aid

Officer or administration staff so that professional treatment may be organised. Any injuries to a child's head, face, neck, genitals or back must be reported to parents/guardian. This record is then kept for the requisite prescribed time.

## **2.0 First Aid Supplies**

- The First Aid Officer will be responsible for the purchase and maintenance of first aid supplies, first aid kits, ice packs and the general upkeep of the first aid room.

## **3.0 Incident Management**

- All injuries or illnesses that occur during class time will be referred to the first aid officer in the Administration Building who will manage the incident. All injuries or illnesses that occur during recess or lunch breaks, will be referred to the teacher on duty and then if needed to the first aid room.
- A daily running sheet will be used in the First Aid room as the record of who is seen for treatment and the outcome. All of these entries will be logged on to Compass and serious accidents onto CASES 21.
- Any student who is collected from school by parents/guardians as a result of an injury and who is administered treatment by a doctor/hospital or ambulance officer as a result of the injury, or where a teacher considers the injury to be greater than "minor" will be reported through Worksafe and DET security services..
- Parents of ill children will be contacted to take the children home.
- Parents who collect children from school for any reason (other than emergency) must sign the child out of the school in a register maintained in the school office.
- All teachers have the authority to call an ambulance immediately in an emergency. If the situation and time permit, a teacher may confer with others before deciding on an appropriate course of action.

## **4.0 Staff**

- A sufficient number of staff (including at least one administration staff member) will be trained to a level 2 first aid certificate, including up-to-date CPR qualifications.
- A supply of medication for teachers will be available in a secure place.
- All staff will be provided with basic first aid management skills, including blood spills, and a supply of protective disposable gloves will be available for use by staff.

## **5.0 School Camps and Excursions**

- All school camps will have at least 1 Level 2 first aid trained staff member at all times.
- A comprehensive first aid kit will accompany all camps, along with a mobile phone.
- All children attending camps or excursions will have provided a signed medical form providing medical detail and giving teachers permission to contact a doctor or ambulance should instances arise where their child requires treatment. The signed medical forms will be taken on camps and excursions.

## 6.0 Communication

- At the commencement of each year, requests for updated first aid information will be sent home including requests for any asthma, diabetes and anaphylaxis management plans, high priority medical forms, and reminders to parents of the policies and practices used by the school to manage first aid, illnesses and medications throughout the year.
- General organisational matters relating to first aid will be communicated to staff at the beginning of each year. Revisions of recommended procedures for administering asthma, diabetes and anaphylaxis medication will also be given at that time.
- It is recommended that all students have personal accident insurance and ambulance cover.

The attached proformas for Asthma, Diabetes and Epilepsy are to be read in conjunction with the *EHPS First Aid Policy*:

# Condition Specific Medical Advice Form

## for a student with Diabetes

This form is to be completed by the student's medical/health practitioner providing a description of the health condition and first aid requirements for a student with a health condition. This form will assist the school in developing a Student Health Support Plan which outlines how the school will support the student's health care needs.

Name of School: \_\_\_\_\_

Student's Name: \_\_\_\_\_ Date of Birth: \_\_\_\_\_

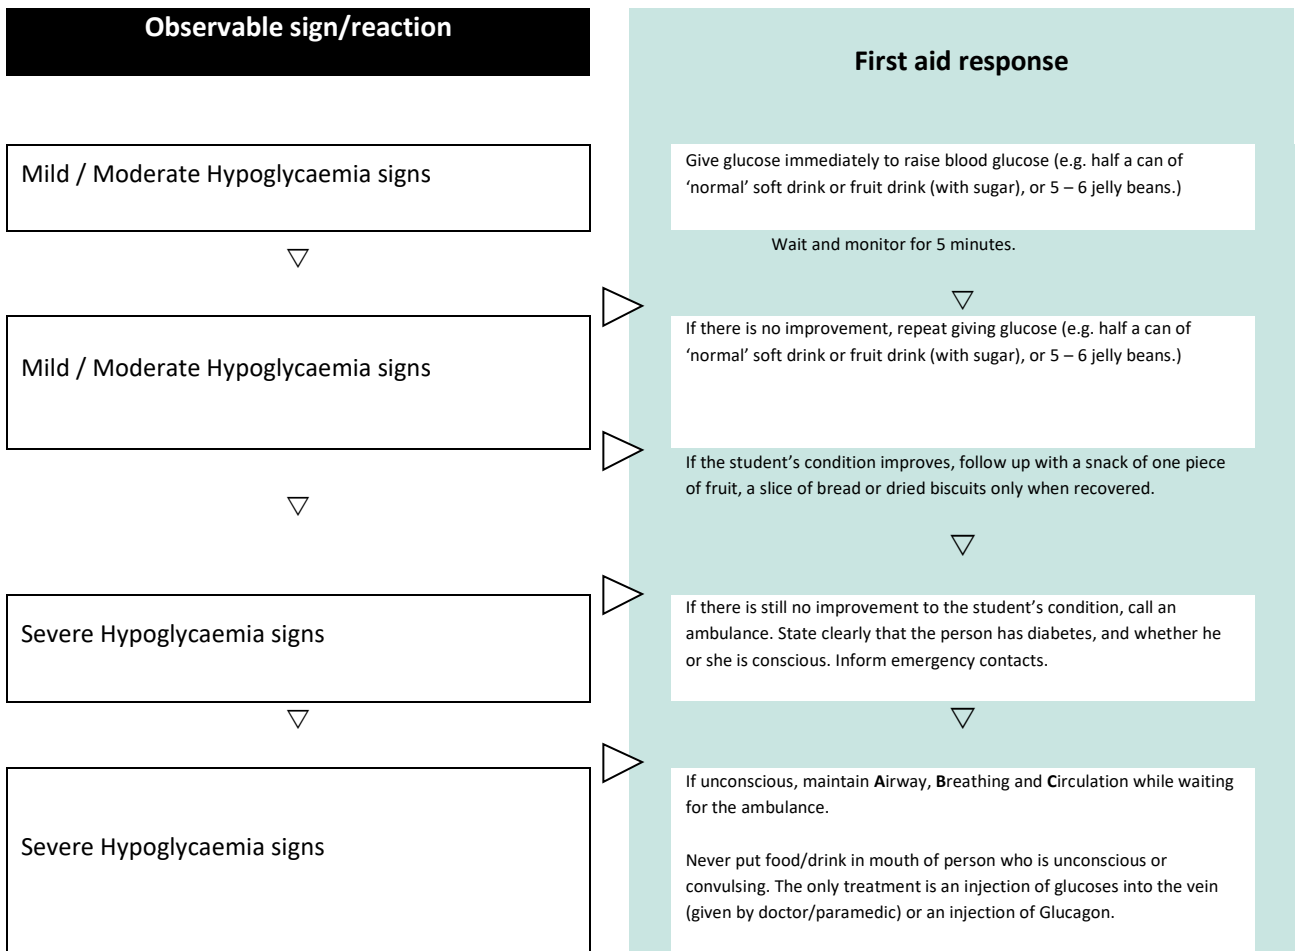

MedicAlert Number(if relevant): \_\_\_\_\_ Review date for this form: \_\_\_\_\_

Description of the condition	Recommended support
<p><b>Diabetes Management</b></p> <p>Please provide relevant details in relation to the student's Diabetes management.</p>	<p>Please describe recommended care</p> <p>If additional advice is required, please attach it to this medical advice form</p>
<p><b>Student self management</b></p> <p>Is this student usually able to self manage their own diabetes care?</p> <p><input type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> <p>If no, please provide details in relation to how the school should support the student in developing self-management.</p>	
<p><b>Relevant issues</b></p> <p>Please outline any relevant issues in relation to attendance at school and learning as well as support required at school.</p>	
<p><b>First Aid – Signs of Hypoglycaemia (low blood glucose)</b></p>	

Description of the condition	Recommended support
<p>Below is a list of observable signs that school staff will look for in relation to a hypoglycaemia. Please provide comment, if required.</p> <p><b>Mild signs:</b> sweating, paleness, trembling, hunger, weakness, changes in mood and behaviour (e.g. crying, argumentative outbursts, aggressiveness), inability to think clearly, lack of coordination</p> <p><b>Moderate signs:</b> inability to help oneself, glazed expression, being disorientated, unaware or seemingly intoxicated, inability to drink and swallow without much encouragement, headache, abdominal pain or nausea.</p> <p><b>Severe signs:</b> inability to stand, inability to respond to instructions, extreme disorientation, inability to drink and swallow (leading to danger of inhaling food into lungs), unconsciousness or seizures (jerking or twitching of face, body or limbs)</p>	<p>Please describe recommended care</p> <p>If additional advice is required, please attach it to this medical advice form</p>

**First Aid – Hypoglycaemia**

The following is the **first aid response that School staff will follow:**

### First Aid– Hypoglycaemia

If you anticipate the student will require anything other the first aid response noted above, please provide details, so special arrangement can be negotiated.

Description of the condition	Recommended support
<b>Warning Signs</b>	Please describe recommended care If additional advice is required, please attach it to this medical advice form
<b>Can you please outline the warning signs (e.g. sensations)</b>	
<b>Triggers</b>	
<b>Can you please outline the known triggers</b> (eg illness, elevated temperature, flashing lights)	
<b>Seizure Types</b>	
Please highlight which seizure types apply:  <input type="checkbox"/> <b>Partial (focal) seizures</b> Which side of the brain is affected? _____  <input type="checkbox"/> <b>Simple partial</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> Staring, may blink rapidly</li> <li><input type="checkbox"/> Only part of the brain is involved (partial)</li> <li><input type="checkbox"/> Person remains conscious (simple), able to hear, may or may not be able to speak</li> <li><input type="checkbox"/> Jerking of parts of the body may occur</li> <li><input type="checkbox"/> Rapid recovery</li> <li><input type="checkbox"/> Person may have a headache or experience sensations that aren't real, such as sounds, flashing light, strange taste or smell, 'funny tummy' These are sometimes called an aura and may lead to other types of seizures.</li> </ul> <input type="checkbox"/> <b>Complex partial</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> Only part of the brain is involved (partial)</li> <li><input type="checkbox"/> Person staring and unaware. Eyes may jerk but may talk, remain sitting or walk around</li> <li><input type="checkbox"/> Toward the end of the seizure, person may perform unusual activities, eg chewing movement, fiddling with clothes (these are called automatisms)</li> </ul>	Please indicate typical seizure frequency and length, and any management that is a variation from standard seizure management.

## Description of the condition

## Recommended support

Please describe recommended care  
If additional advice is required, please attach it to  
this medical advice form

Confused and drowsy after seizure settles, may sleep.

### Generalised seizures

#### Tonic clonic

- Not responsive
- Might fall down/cry out
- Body becomes stiff (tonic)
- Jerking of arms and legs occurs (clonic)
- Excessive saliva
- May be red or blue in the face
- May lose control of bladder and/or bowel
- Tongue may be bitten
- Lasts 1-3 minutes, stops suddenly or gradually
- Confusion and deep sleep (maybe hours) when in recovery phase. May have a headache.

#### Absence

- Vacant stare or eyes may blink/roll up
- Lasts 5-10 seconds
- Impaired awareness (may be seated)
- Instant recovery, no memory of the event.

#### Myoclonic

- Sudden simple jerk
- May recur many times.

## Duration

How long does recovery take if the seizure isn't long enough to require Midazolam?

## Person's reaction during and after a seizure

Please comment

## Any other recommendations to support the person during and after a seizure

## Signs that the seizure is starting to settle

## First Aid - Management of Seizures

The following is the **first aid response** that School staff will follow:

	"Major Seizures"	"Minor Seizures"
	Convulsive seizures with major movement manifestations eg: tonic-clonic, tonic, myoclonic, atonic, and partial motor seizure	Seizures with staring, impaired consciousness or unusual behaviour e.g. complex partial seizures and absence seizures
<b>1</b>	Stay calm	Stay calm
<b>2</b>	Check for medical identification	Check for medical identification
<b>3</b>	Protect the person from injury by removing harmful objects close to them. Loosen any tight clothing or restraints. Place something soft under their head.	Protect the person from injury by removing harmful objects close to them
<b>4</b>	Stay with the person and reassure them. Do not put anything in their mouth and do not restrain them.	Stay with the person and reassure them
<b>5</b>	Time the seizure	Time the seizure
<b>6</b>	When the seizure is over, roll the person onto their side to keep their airway clear	If a tonic-clonic seizure develops, follow major seizure management
<b>7</b>	Treat any injuries	Stay with the person and reassure them, they may be sleepy, confused or combative after the seizure
<b>8</b>	Consider if an ambulance needs to be called. An ambulance should be called when: <ul style="list-style-type: none"> <li>• The seizure lasts longer than 5 -10 minutes.</li> <li>• Another seizure quickly follows</li> <li>• The person remains unconscious after the seizures ceases</li> <li>• The person has been injured</li> <li>• You are about to administer diazepam or midazolam</li> <li>• You are unsure</li> <li>• The seizure happens in water</li> <li>• The person is pregnant or a diabetic</li> <li>• The person is not known to have epilepsy.</li> </ul>	
<b>9</b>	Stay with the person and reassure them, they may be sleepy, confused or combative after the seizure	

### First Aid - Management of Seizures

If you anticipate the student will require anything other the first aid response noted above, please provide details, so special arrangement can be negotiated.
